

Cybersecurity Awareness Online Training program - available at **no cost** to BDPA New Jersey members based on license availability on a first come/first serve basis. According to an IBM study, 95% of security breaches are caused by human error. Basic security awareness training like this helps protect businesses from breaches and individuals from becoming victims. This training is for everyone, not just IT people. Businesses typically sign up their entire staff to take this training in order to mitigate security breaches at their company. If a business owner is interested in providing this to their entire staff, please have them contact me directly to set them up.

- Cloud based security portal
- Online training that employees go through at their own pace
- Engaging training videos
- Employee security testing
- Employee training certificates
- Administrator training reports
- New employee training

Your members can sign up for this online training by filling out the form on the [following page](#) and enter **BDPANJ** in the questions/comments area. <http://www.WorryFreeMD.com/Training>

Please let me know if you have any questions about the training and/or how you are going to promote this. When you get board approval, I'd like to have a press release written so let me know when and I'll reach out for some quotes.

Thanks.
